Education

Bachelor of Computer Science and Engineering

Bangladesh University of Professionals (BUP)

Jan 2024 – Dec 2027 (Expected)

Dhaka, Bangladesh

- **CGPA:** 3.55 / 4.00 (up to 4th semester)

Higher Secondary Certificate (HSC)

Chattogram Govt. Women's College

2020 – 2022

Chattogram, Bangladesh

- **GPA:** 5.00 / 5.00 **Group:** Science

Secondary School Certificate (SSC)

Chattogram Cantonment Board High School

2018 – 2020

Chattogram, Bangladesh

- **GPA:** 5.00 / 5.00 **Group:** Science

Technical Skills

Languages C, C++, Java, MySQL
Frameworks React.js, Node.js
Tools & Platforms Git, Linux, Arduino

Projects

Hospital Management System | [Source](#)

Java | Java Swing | MySQL | JDBC

- Built a secure, role-based Hospital Management System for efficient patient care, appointment scheduling, medical records management, and billing using Java and MySQL.

Hall Meal Planner | [Source](#)

Java | Java Swing | Maven | CSV

- Built a Java-based Hall Meal Planner that helps students generate cost-effective and nutritious weekly meal plans using the 0/1 Knapsack Algorithm.

Campus Navigation System | [Source](#)

HTML | CSS | JavaScript

- Developed an interactive campus navigation system for efficient route planning, shortest path visualization, and campus graph management using Dijkstra's and Kruskal's algorithms.

Memory Flip Game | [Source](#)

*Java | JavaFX | FXML | Apache
Maven | Git*

- Developed an interactive memory card matching game featuring card flip animations, multiple difficulty levels, countdown timer, and match detection logic using JavaFX and Maven.

Mini Game Hub | [Source](#)

Java | JavaFx | CSS | Maven

- Developed a Java-based Mini Game Hub integrating multiple classic console games through a unified menu-driven interface.

Line Following Robot | [Source](#)

*Arduino Uno | Embedded C/C++ | IR
Sensors | L298N Motor Driver*

- Designed and implemented an Arduino Uno-based Line Following Robot using IR sensors for autonomous real-time path tracking and differential drive control.

- Developed an Arduino-based bridge safety system that monitors bridge load in real time, restricts vehicle entry during overload conditions, and provides visual and audible safety alerts

Co-curricular Activities

IEEE Computer Society BUP Student Branch | General Member

November 2025 - Present

- Participate in technology-focused events and knowledge-sharing sessions organized by the IEEE Student Branch
